

FCC, do not buckle under to the political pressure from Clear Channel et al regarding regulations of satellite radio. Free enterprise is the key to American Capitalism. I am a believer that the airwaves belong to the people. Deregulation has ruined local radio in smaller markets. This proposal would protect those who have walked away from local radio coverage to create FAVORITISM biased against Satellite radio. Satellite radio has overcome the homogenization of the radio airwaves. Either fully regulate, as it was since the 1933 telecom act until the deregulation and control of the airways into a few corporate hands, or not, You must get your hands out of the Disney, Clear Channel, Fox lobbyists and defend the citizens of the United States of America! Allow the satellite channels the same rights to grow their business as the broadcast conglomerates.
